ON PATENTABILITY**

International application No.
PCT/IB2004/001616

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	1-7
	No: Claims	
Inventive step (IS)	Yes: Claims	1-7
	No: Claims	
Industrial applicability (IA)	Yes: Claims	1-7
	No: Claims	

2. Citations and explanations (Rule 70.7):

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item V.

2. The following documents are referred to in this communication:

D1 : WO 02/058361 A (WONG GREG A ;SHIEH HUGH (US); AT & T
WIRELESS SERVICES INC (US)) 25 July 2002 (2002-07-25)

3. Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document):

a data processing device communicating with a remote system (cf. page 9, lines 20-21), said device storing parameters that identify a user account including a one-time parameter for a one-time use and a permanent parameter that is deactivated (cf. page 9, line 19 to page 10, line 17); one time use is the TAI and S-ESN, the permanent identifier is the ESN). Document D1 also discloses that when the device is switched on the one-time parameter is used to logon the network (cf. page 9, lines 25-26) and tha upon successful logon the one-time parameter is exchanged with the permanent parameter (cf. page 10, lines 10-17).

From this, the subject-matter of independent claim 1 differs in that:

- the permanent parameter is stored in the remote system;
- the device and the system store a parameter identifying a current active account that is attached to a second device;
- upon logon the first device commands the network to replace the parameters from the old for the new one in the remote system, with the current active account being deactivated.

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT)

The advantage provided by the novel features is that a user can keep the data and settings from a previous device when he changes to a new device. Therefore the subject-matter of claim 1 involves an inventive step (Article 33(3) PCT).

4. Claims 2-8 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
